

Horizon::Networking  
::Socket::async\_read

Horizon::Networking  
::Socket::async\_read  
\_with\_callback

ByteBuffer::ensure  
\_free\_space

```
graph LR; A[Horizon::Networking::Socket::async_read] --> C[ByteBuffer::ensure_free_space]; B[Horizon::Networking::Socket::async_read_with_callback] --> C;
```

The diagram illustrates a dependency or call relationship. Two source functions, 'Horizon::Networking::Socket::async\_read' and 'Horizon::Networking::Socket::async\_read\_with\_callback', are shown in white boxes on the left. Blue arrows point from each of these boxes to a single target function, 'ByteBuffer::ensure\_free\_space', which is shown in a gray box on the right.
