

Horizon::Zone::ZoneClient
Interface::disconnect

Horizon::Zone::ZoneClient
Interface::update_session

Horizon::Zone::ZC_ACK
_REQ_DISCONNECT::deliver

```
graph LR; A[Horizon::Zone::ZoneClient Interface::disconnect] --> D[Horizon::Zone::ZC_ACK _REQ_DISCONNECT::deliver]; B[Horizon::Zone::ZoneClient Interface::update_session] --> D;
```

The diagram illustrates a mapping from two interface methods to a single deliver method. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'Horizon::Zone::ZoneClient Interface::disconnect' and the bottom box contains 'Horizon::Zone::ZoneClient Interface::update_session'. On the right, a gray rectangular box contains the text 'Horizon::Zone::ZC_ACK _REQ_DISCONNECT::deliver'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both interface methods are mapped to the same deliver method.
